

# CitiusTech: CQ-IQ

## Cloud-based Clinical Analytics Platform

CQ-IQ is the healthcare industry's first configurable and scalable platform for CQM calculation, in a HIPAA compliant cloud. It enables healthcare organizations to accelerate their clinical quality reporting and analytics capabilities.

In a fast-changing healthcare landscape, clinical quality measures (CQMs) are becoming increasingly important to healthcare organizations. Reporting on CQMs is a core requirement of regulatory guidelines, and is driving the performance and quality improvement initiatives across payers, providers and healthcare technology companies.

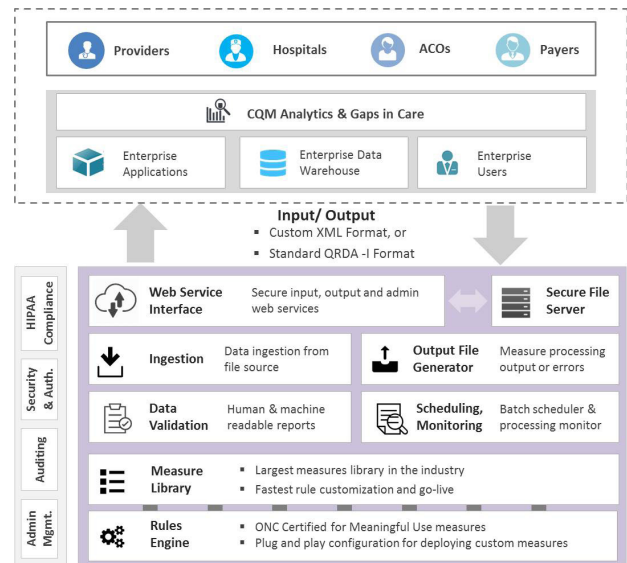

### CQ-IQ: Overview

CQ-IQ is an ONC-HIT certified, HIPAA compliant, cloud-based clinical analytics platform, that leverages the power of BI-Clinical (CitiusTech's healthcare BI and analytics platform). CQ-IQ currently covers more than 250 pre-built clinical quality measures, including support for MIPS, ACO, HEDIS, VBP, etc. CQ-IQ enables healthcare organizations to:

- Compute CQMs for all care settings (physician practices, hospitals, ACOs, health plans)
- Participate in federal incentive programs, commercial payer initiatives and provider quality programs
- Leverage its technology agnostic ability to easily integrate with any storage technology

### Key Capabilities

- Easy upload and acceptance of standard files CCDA and QRDA-1
- Quick access to quality scores at patient and provider level
- Integrated with existing applications (e.g. care management solutions, EHRs, data warehouses and big data solutions). Robust rules engine for providing CQM computation as a web service
- Easy-to-use testing and data validation tools for data structure, data quality and terminology compliance
- Flexibility to align measures and reporting periods with internal processes and workflows
- Strong ROI with pay-as-you-go model
- ONC-HIT 2014 certified (V15.9, 11122015-3110-8) for Meaningful Use clinical quality measures\*

CQ-IQ: Cloud-hosted Clinical Analytics Platform

### CQ-IQ: Powered by BI-Clinical

CQ-IQ provides an enterprise clinical quality measures solution. It is backed by CitiusTech's commitment to keep CQM definitions current with changing industry requirements. CQ-IQ leverages BI-Clinical Rules Engine for clinical and regulatory reporting. BI-Clinical, CitiusTech's proprietary healthcare BI and analytics platform, has been deployed across 4,500 provider locations. BI-Clinical covers over 600 KPIs and performance measures and is a highly configurable solution for quality reporting.
