## **CITIUSTECH COMPLETES ANOTHER MILESTONE YEAR: 2010 REVENUES GROW BY OVER 55%**

**Sarasota, FL (February 15, 2011)** – CitiusTech, a leading healthcare technology solutions and services provider, announced that it has completed the calendar year 2010 with over 55% growth in revenues. CitiusTech now has over 400 employees worldwide. The growth was driven by expansion in CitiusTech’s services and solutions - software product engineering, professional services and healthcare BI and analytics (BI-Clinical).

During 2010, CitiusTech expanded its software engineering and professional services business lines. CitiusTech’s Meaningful Use practice enabled many healthcare IT vendors to successfully complete Meaningful Use certification. In addition, CitiusTech professional services team partnered with EMRs and clinical application organizations to help them scale their professional services organizations. CitiusTech retained the distinction of having the largest number of HL7 certified professionals worldwide. CitiusTech also grew its offices in Bellevue, WA, Singapore and Mumbai.

CitiusTech’s BI-Clinical framework extended both in capabilities and market reach. BI-Clinical 10.3 received ONC-ATCB 2011/2012 certification as an EHR Module for clinical quality reporting and data submission. BI-Clinical 10.3 covers all Meaningful Use measures needed for Eligible Professionals and Eligible Hospitals, and is the only clinical quality OEM solution designed for healthcare IT vendors.

“2010 has been a very successful year for CitiusTech. Given the transformation in the healthcare IT industry worldwide, the next 3-5 years are likely to be very exciting,” said Rizwan Koita, CEO, CitiusTech. “CitiusTech will continue to build distinctive partnerships with healthcare IT vendors and support their business growth.”

### **About CitiusTech**

CitiusTech ([www.citiustech.com](http://www.citiustech.com)) is a specialist provider of technology services and solutions to healthcare IT vendors, healthcare providers, managed care organizations, and disease management companies. CitiusTech offers a range of technology consulting and services aligned with key practice areas – healthcare interoperability, healthcare business intelligence, cloud computing, medical imaging, mobile health and consumer health. CitiusTech’s BI-Clinical framework is ONC-ATCB 2011/2012 certified EHR module by CCHIT. CitiusTech’s ability to provide cutting edge healthcare technology expertise, together with world-class service quality and a global resource base, enables CitiusTech to offer a distinctive value proposition to clients.
