

CitiusTech Attains Microsoft Gold Certified Partner Status in Microsoft Partner Program in Business Intelligence competence

CitiusTech Further Distinguishes Itself by Earning a Microsoft Competency in Business Intelligence & Releasing an Enhanced Version of BI-Clinical™ Framework

Sarasota, FL — April 29, 2009 — CitiusTech, a leading provider of healthcare technology solutions and services, today announced that it has attained Microsoft Gold Certified Partner status in the Microsoft Partner Program with a competency in Business Intelligence. As a Microsoft Gold Certified Partner, CitiusTech has demonstrated its expertise in leveraging Microsoft business intelligence technologies for developing its healthcare business intelligence framework (BI-Clinical) and custom solutions for its healthcare customers.

CitiusTech released an enhanced version of the BI-Clinical framework, which provides an integrated approach for clinical, operational and financial performance management in Healthcare – covering CMS JCAHO, NCQA, Leapfrog, and pay-for-performance requirements. BI-Clinical framework includes comprehensive disease registries and reporting for chronic disease conditions – including diabetes, hypertension, COPD, CAD, and obesity – which are key components of the latest CCHIT requirements. CitiusTech has implemented the BI-Clinical framework on Microsoft business intelligence technologies – Microsoft Office Performance Point Server 2007, Microsoft Office SharePoint Server 2007, Microsoft SQL Server 2005 and Business Intelligence Development Studio.

“Healthcare business intelligence is the fastest growing category in healthcare IT. Our healthcare business intelligence practice and BI-Clinical framework is being very well received in the marketplace. Use of the Microsoft BI stack has enabled us to reduce the total cost of ownership by over 40% and enabled us to implement relatively complex healthcare BI solutions in less than 10 weeks for our enterprise healthcare clients! We are very excited to have achieved Microsoft Gold Certified Partner status with a competency in Business Intelligence,” said Jagdish Moorjani, Chief Operating Officer at CitiusTech.

“CitiusTech has a distinctive approach to healthcare business intelligence, which leverages its extensive healthcare technology expertise and recommendations of leading regulatory and professional organizations in healthcare,” said Paul Smolke, Senior Director, Health Industry Solutions, Worldwide Public Sector at Microsoft Corp. “Today Microsoft recognizes CitiusTech’s contribution in healthcare and its success in delivering cutting-edge healthcare business intelligence solutions on Microsoft technology platforms.”

The Microsoft Partner Program was launched in October 2003 and represents Microsoft’s ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace, and delivers more value to help partners’ businesses be successful.

About CitiusTech
