

FOR IMMEDIATE RELEASE

BI-CLINICAL OFFERS 100% COVERAGE OF ALL ACO QUALITY MEASURES RELEASED BY CMS

Princeton, NJ (November 22, 2011) – CitiusTech announced today that its BI-Clinical platform for healthcare business intelligence and advanced analytics supports all ACO quality measures that are part of the ACO final rule released by CMS on October 20, 2011.

BI-Clinical can now help ACO participants assess and report performance and quality of care, across all four domains – patient / caregiver experience, care coordination / patient safety, preventive health and at-risk population. With customizable interfaces, gaps-in-care reports, clinical alerts and comparative care-cost benchmarking, BI-Clinical enables ACOs to effectively manage quality of care for its patients, at both the individual as well as population level. BI-Clinical’s flexible Clinical Measure Processing Engine enables ACOs to modify clinical measures and create new measures to effectively manage performance.

Dennis Swarup, Business Director at CitiusTech, highlighted, “Most ACOs will include hospitals with different EMRs, clinical applications, revenue cycle applications and financial systems. BI-Clinical’s ability to support both claim and EHR data in a multi-vendor environment is key to addressing the ACOs’ cross-enterprise reporting and performance management needs.”

BI-Clinical has strong professional services partners across North America, who enable ACO participants to define their overall BI/analytics and reporting strategy for all stakeholders. Our partners also implement BI-Clinical and integrate the platform with ACO and hospital IT environments.

About BI-Clinical

CitiusTech’s BI-Clinical is a modular, scalable and interoperable platform for healthcare BI, analytics and regulatory compliance. With over 600 pre-built measures and KPIs for clinical, financial, operational and regulatory reporting, BI-Clinical ensures 100% coverage of all Meaningful Use, PQRS, HEDIS, JCAHO and ACO quality reporting measures. BI-Clinical 10.3 is the ONLY modular BI solution that is ONC-ATCB 2011/2012 certified for ALL Eligible Hospital (EH) and Eligible Professional (EP) Meaningful Use criteria. BI-Clinical has strong professional services partnerships in North America. To know more about BI-Clinical and our professional services partners visit <http://www.citiustech.com/bi-clinical>
