

FOR IMMEDIATE RELEASE

CITIUSTECH LAUNCHES BETA RELEASE OF BI-CLINICAL FOR ACO

Sarasota, FL – June 10, 2011 – CitiusTech announced today that its BI-Clinical Framework for ACOs has been launched into beta. BI-Clinical for ACOs supports all 65 quality performance measures, proposed by CMS that ACOs need to meet to be eligible for the Shared Savings Program.

The Shared Savings Program is a key Medicare delivery system reform initiative that will be implemented under the Affordable Care Act and focuses on enhancing the quality of individual and population care, as well as reducing healthcare expenditure. ACOs that meet the necessary quality performance standards would be eligible for shared savings under this program.

“BI-Clinical now comprehensively supports CMS guidelines for ACOs, with a robust framework to measure performance, generate a wide range of clinical and financial reports and identify areas for performance improvement”, says Bimal R. Naik, Chief Client Officer of CitiusTech. “The framework provides a modular, scalable platform for ACO performance management, population health management and actionable intelligence”.

In addition, CitiusTech also provides customers with an ACO Management Framework that includes ACO technology assessment, workflow analysis and technology roadmap development.

About BI-Clinical

CitiusTech’s BI-Clinical framework 10.3 (ONC-ATCB 2011/2012 Certified for both EP and EH) offers highly modular and scalable approach to healthcare business intelligence and analytics. BI-Clinical offers comprehensive clinical, financial, operational and Meaningful Use BI and reporting.
