

Case Study

MU Reporting for Integrated Delivery Network

Client Requirements

Client is a leading network of hospitals and clinics, focusing on inpatient and outpatient care. Client needed a solution to comply with MU Stage 2, with the ability to scale up to support additional regulatory measures, e.g. PQRS, PCMH, etc. BI-Clinical solution was selected to implement a scalable hosted BI and reporting solution that integrated with multiple source systems in the client's environment and delivered key use cases for Meaningful Use reporting.

Solution Schematic

CitiusTech Solution:

- Cloud-based deployment of BI-Clinical to enable easy availability
- Configurable Rules Engine to address MU2
- BI-Clinical data views on top of client's data warehouse and deployment of BI-Clinical QRDA generation utility
- BI-Clinical Data Submission utility to generate MU2 compliant QRDA for data submission
- MU2 CQM scorecards and advanced analytics to monitor provider performance

Value Delivered

- Successfully implemented a hosted solution for EH and EP Meaningful Use compliance
- Saved over 60-70% development costs
- Tracked **40+ quality measures** covering **9 million visits/year** across **1 million lives**
- Set up to scale for additional clinical quality initiatives like MU3, PQRS, PCMH, etc.
