

## Case Study

# Private Cloud for Healthcare

## Client Requirements

Client is a leading provider of medical imaging solutions. Client needed to create a cloud-based image exchange application which provides a facility to share DICOM and non-DICOM image files with healthcare providers and patients. This application should also facilitate share, view and download of patient images and reports on the cloud. CitiusTech was selected, given its expertise in cloud and medical imaging.

## Solution Schematic

## CitiusTech Solution:

- Architected, designed and developed cloud-based portal, hosted on Azure platform
- Built automation, continuous integration and deployment of entire application for different environments on Azure
- Ensured encryption of data at rest and motion, HIPAA compliance, audit logs - 21 CFR
- Provided claim-based authentication, RBAC, application and infra security
- Provisioned for auto-horizontal scaling, fault tolerance, high availability, disaster recovery

## Value Delivered

- Leveraged CitiusTech strong cloud expertise for full application lifecycle mgmt. on Azure
- Secured platform by server hardening, setting up address space and subnets, configuring ACL, setting up patching process
- Optimized performance by code and query optimization
