

## FOR IMMEDIATE RELEASE

### CITIUSTECH ACHIEVES ISO 13485 CERTIFICATION

**Princeton, NJ (January 13, 2014)** – CitiusTech, a leading provider of healthcare technology solutions and consulting services, announced today that it is now certified to the ISO 13485 quality management system standard for medical devices. The certification, granted by the International Organization for Standardization (ISO), demonstrates CitiusTech’s commitment to maintaining effective risk management processes and ensuring consistent quality in products and services provided to its partners and customers. The ISO 13485 certification covers management processes

related to product and service creation for:

- Software design, development, maintenance and support
- Software quality assurance and test automation
- BI-Clinical customisation & support

“With the ISO 13485 certification, our medical technology partners get further assurance of the quality and efficacy of technology solutions built by CitiusTech.” says Punam Shejale, Vice President Quality and Information Security, CitiusTech. “Our long term relationships with some of the world’s leading medical technology companies are testament to our high standards of technology excellence and consistency of our delivery processes.”

ISO 13485 is a quality management system standard where organizations need to demonstrate their ability to consistently meet customer & regulatory requirements applicable to medical devices and related services. The primary objective of this standard is to facilitate harmonized medical device regulatory requirements for quality management systems.
