

Image Ingestion for AWS Health Imaging

for Healthcare & Life Sciences
for North America

Business Challenges

- Client is one of the leading providers of the Imaging diagnostics services across USCAN geography.
- Client's requirement was to build a DICOM ingestion pipeline on AWS HealthLake Medical Imaging. The pipeline should scan uploaded images for virus/malware and validate if they are valid images before ingestion.
- Ensure the pipeline's scalability, security, and performance while handling concurrent image uploads. Implement asynchronous processing, error handling, logging, and monitoring functionalities to optimize efficiency and user experience.

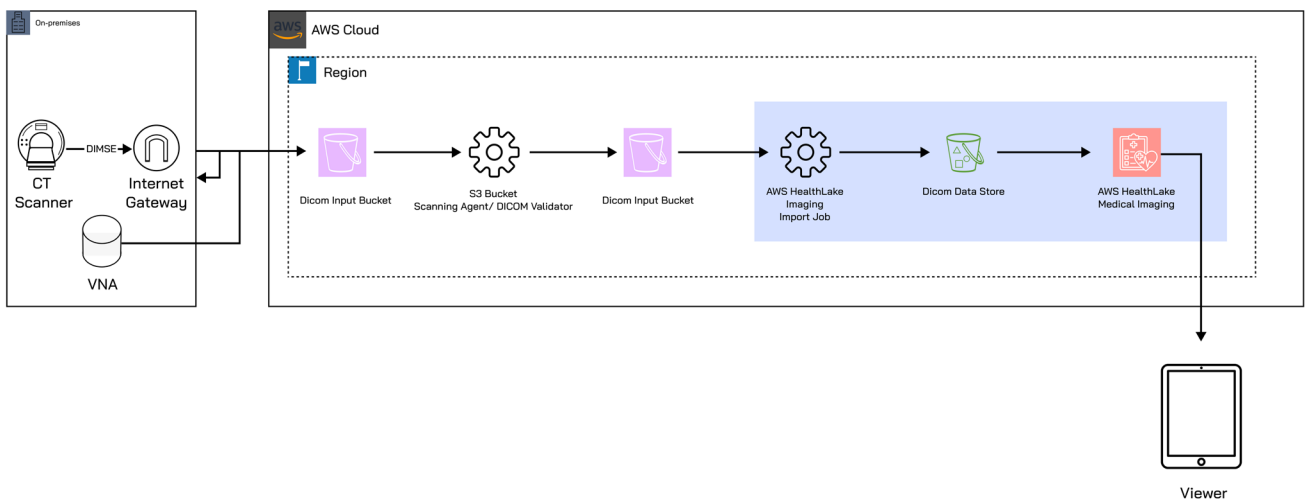

A woman in a white lab coat with a stethoscope around her neck, looking down at a tablet computer. In the background, there are faint, stylized images of medical equipment and a human figure.

CASE STUDY

CITIUSTECH SOLUTIONS

- CitiusTech designed a highly scalable ingestion pipeline using AWS Services such as Amazon S3 Bucket, ASG, EC2, Lambda, SQS, SNS, API Gateway and CloudFront.
- The pipeline provides virus/malware scanning and DICOM image validation capabilities, ensuring that only clean and valid images are ingested into AWS HealthLake Medical Imaging.
- Built-in monitoring functionality enables real-time tracking of image ingestion progress at each stage, ensuring efficiency and identifying potential issues promptly.

SOLUTION SCHEMATIC

VALUE DELIVERED

Scalability & Performance:

The pipeline efficiently handles varying workloads with AWS Auto Scaling and asynchronous processing, ensuring optimal performance and reduced processing time.

Security & Data Integrity:

Virus scanning and image validation guarantee that only clean, valid images are ingested, safeguarding data integrity and protecting against security threats.

Real-time Monitoring:

The built-in monitoring system tracks ingestion progress, enabling proactive issue resolution and ensuring a reliable and efficient process.

Shaping Healthcare Possibilities

CitiusTech is a global IT services, consulting, and business solutions enterprise 100% focused on the healthcare and life sciences industry. We enable 140+ enterprises to build a human-first ecosystem that is efficient, effective, and equitable with deep domain expertise and next-gen technology.

With over 8,500 healthcare technology professionals worldwide, CitiusTech powers healthcare digital innovation, business transformation and industry-wide convergence through next-generation technologies, solutions, and products.
