Job Title: Sr. Technical Specialist – Development, Job Code – CT1104

Work Experience Required: 2 years

Location: Princeton, New Jersey and various unanticipated locations throughout the U.S

Duties:

- Develop a mapping structure as per business rules.
- Integrate client-patient clinical and payer data from multiple source systems into a de-identification server.
- Achieve an effective and sustainable de-identification of sensitive data by assessing the re-identification risks throughout the life cycle of their data masking implementations.
- Develop the application business logic and implement a process for the non-production environments as per HIPAA as well as other healthcare regulations.
- Configure De-identification Rules Engine to address De-Identification requirements.
- Implement desired functionality adhering to software engineering best practices using technologies approved by clients such as Redgate, Oracle, SQL, SSIS, Visual Studio, and TFS.
- Analyze, diagnose and resolve de-identification issues.
- Analyze and provide solutions for issues raised during the performance check of the product.
- Work using C#.net, SQL SERVER and ETL Packages (SSIS), SSRS, Visual Studio and TFS.
- Travel and relocation possible to unanticipated client locations throughout the U.S. May telecommute and work remotely from any location in the United States.

Requires a Master's Degree or foreign equivalent degree in Computer Science, Computer Engineering, Information Systems, or any related field and two (2) years of experience in the job offered or two (2) years of experience in using C#.net, SQL SERVER and ETL Packages (SSIS), SSRS, Visual Studio and TFS. In lieu of a Master's Degree or foreign equivalent degree in Computer Science, Computer Engineering, Information Systems, or any related field and two (2) years of experience, Employer will accept a Bachelor's Degree or foreign equivalent degree in Computer Science, Computer Engineering, Information Systems, or any related field followed by five (5) years of progressive IT-related experience. Five (5) years of experience therein to include two (2) years using C#.net, SQL SERVER and ETL Packages (SSIS), SSRS, Visual Studio and TFS. Travel and relocation possible to unanticipated client locations throughout the U.S. May telecommute and work remotely from any location in the United States.
