Summary:

CitiusTech is seeking top-notch IT professionals with strong technical skills to build applications and products using modern architecture and technologies.

Duties:

- Designing and developing product interfaces and experiences for non-technical users
- Translating designs and wireframes into high-quality code
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Working directly with business stakeholders; analyzing and understanding customer requirements
- Engaging and contributing to a culture that encourages open communication, accountability, creativity, and innovation
- Communicating architectural designs and problems concisely
- Managing individual project priorities, deadlines, and deliverables
- Staying abreast of emerging technologies and how they can be applied to existing client products

Requirements:

- A degree or diploma in computer science, computer engineering, computer applications or a related IT field.
- 2+ years of experience in the Information Technology field
- 2+ years' experience building scalable modern web applications using ASP.NET, Web API and JavaScript
- Experience in building healthcare/clinical/insurance IT applications as per global standards
- Enthusiasm for learning, collaboration, and mentorship
- A self-starter and collaborate with other teams (inside and outside of development)
